

General Waste

Material free of any apparent or actual pathological/infectious, radioactive or hazardous chemical contamination.
Note: Some laboratory material may be decontaminated and then discarded as general waste.
[Information on Waste Minimization and Pollution Prevention Guidance](#)

MOST GENERAL WASTE CAN BE RECYCLED!

Examples of General Waste That Cannot Be Recycled

- Decontaminated media or labware
- Pyrex glassware (other glassware can typically be recycled)
- Uncontaminated animal bedding
- Styrofoam or any polystyrene type materials
- Food contaminated items that cannot be decontaminated

Materials Which Are NOT General Waste

- NEVER use an MPW box to dispose of general waste or confidential materials
- Items which contain chemical, radioactive materials or the actual or perceived presence of pathogenic agents
- “Sharps” (needles, syringes, scalpel blades, etc.) – see MPW Section
- Empty 5 gallon (or larger) plastic or metal containers, such as those used for solvents or paint – see Chemical Waste Section

Office or Lab Waste

- **Reduce, Reuse and Recycle – think recycling first before you trash it!**
- Strive for **ZERO WASTE** where possible.

Glass/Plastic Labware

- Place non-recyclable uncontaminated or decontaminated labware in the Disposable Labware & Broken Glass box
- Close box and secure with filament tape
- Glassware/labware that cannot readily be chemically decontaminated should be autoclaved prior to disposal as general waste

Liquid Culture Media

- Before disposal, cell culture media must be decontaminated (see [MPW Section](#) for instructions) either by steam autoclave or adding disinfectant directly to vessel or treating pooled spent media
- Decontaminated media may be discarded into a sink drain
- Dispose of empty, decontaminated cell culture vessels in the Disposable Labware & Broken Glass box

Solid Media

- Autoclave (see [MPW Section](#)), then dispose of the bag and solid media into a Disposable Labware & Broken Glass box

Animal Bedding

- Most contaminated bedding may be decontaminated by autoclaving and disposed of as general waste
- Contaminated animal bedding which cannot be decontaminated by autoclaving must be disposed of as MPW
- Uncontaminated animal bedding should be disposed in general waste, not as MPW
